DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over McEachern et al. (US 5,536,979). The reference discloses an inductive charger having an inductive C portion 9 that can be hooked onto an inductive core 3 for inductive charging the battery of the device. However it does not specifically disclose the C portion is a loop. It would have been obvious to one having ordinary skill in the art that the C shape or loop shape would function in a similar manner since the core would be on the "inside" of the C shape loop. Hence it can carry the device to be charged.

Allowable Subject Matter

Claims 1-24 and 34 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 25-32 have been considered but are moot in view of the new ground(s) of rejection.
